

KANAK KUMAR HINGE

DevOps Engineer | Iac | Cloud | SRE |

+91 8602343454 | Gmail | LinkedIn | GitHub | Portfolio | Indore, India

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing and operating production-grade cloud infrastructure on AWS using Terraform, Docker, and Kubernetes. Proven record of building automated CI/CD pipelines with GitHub Actions that reduced deployment lead time by 30% and enabled zero-downtime releases. Adept at Infrastructure as Code, container orchestration, and observability — applying DevOps and SRE best practices to improve system reliability and accelerate software delivery at scale.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, S3, IAM, VPC, Lambda, RDS, CloudWatch), Terraform, Ansible

CI/CD & Automation: GitHub Actions, Jenkins, Bash Scripting, Python

Containers & Orchestration: Docker, Kubernetes (K8s), Helm

Monitoring & Observability: AWS CloudWatch, Prometheus, Log Analysis, Alerting & Dashboards

Networking & OS: Linux (Ubuntu), TCP/IP, DNS, SSH, VPC Networking, Firewalls

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Vected Technologies Pvt. Ltd.

Indore, India

DevOps Engineer

March 2025 – Present

- Administered and provisioned AWS infrastructure (EC2, S3, IAM, VPC) using version-controlled Terraform modules, applying Infrastructure as Code principles to enable repeatable, auditable, and secure deployments
- Designed and optimized CI/CD pipelines using GitHub Actions as part of the broader DevOps architecture, reducing deployment lead time by 30% and enabling faster, safer release cycles.
- Containerized microservices with Docker and deployed on Kubernetes, ensuring **100% environment consistency** across development and staging environments.
- Automated infrastructure and deployment tasks via Bash and Python scripts, eliminating manual steps and reducing human error.
- Configured AWS CloudWatch dashboards and alarms for proactive monitoring and incident response.

Vected Technologies Pvt. Ltd.

Indore, India

DevOps Engineer Intern

November 2024 – February 2025

- Automated deployment pipeline tasks and managed cloud infrastructure, gaining production-level exposure to CI/CD tooling, Docker, Kubernetes, and AWS administration.
- Assisted in configuring infrastructure monitoring and alerting, supporting incident response and improving system observability across AWS cloud environments.

KEY PROJECTS

Automated Multi-Tier AWS Infrastructure with Terraform

Terraform, AWS, Bash

- Built reusable Terraform modules to provision multi-tier AWS environments, enforcing infrastructure consistency and eliminating manual setup overhead.
- Implemented S3 remote state with DynamoDB locking, enabling safe collaborative IaC workflows across the engineering team.

End-to-End CI/CD Pipeline with GitHub Actions & Docker

Docker, GitHub Actions, Linux

- Built a fully automated pipeline covering build, test, Docker packaging, and deployment on every Git push, enabling daily releases with zero manual intervention.
- Implemented rolling update strategies achieving zero-downtime deployments in containerized environments.

AI-Powered Bulk Email Automation Tool

Python, SMTP, OpenAI API, Pandas

- Built a bulk email automation system integrating the OpenAI API for dynamic personalized content generation per recipient, cutting outreach time from hours to minutes.
- Managed contact data via CSV and automated resume attachment delivery using Python SMTP libraries.

EDUCATION

Medi-Caps University

Indore, India

Bachelor of Technology (B.Tech), Mechanical Engineering

2020 – 2024

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – Amazon Web Services
- Copado Salesforce DevOps Certification – Copado
- AZ-400: Development for Enterprise DevOps – Microsoft
