SUMMARY

DevOps Engineer experience in DevOps architecture, AWS administration, and Infrastructure as Code (IaC), building scalable cloud infrastructure and production-grade CI/CD systems on AWS. Proven track record of designing secure, repeatable AWS environments with Terraform, containerizing and orchestrating microservices with Docker and Kubernetes, and automating deployment pipelines to reduce lead time and manual error. Strong focus on observability, system reliability, and applying DevOps/SRE best practices across the software delivery lifecycle.

EXPERIENCE

Vected Technologies Pvt. Ltd. **March 2025 – Present**
DevOps Engineer *Indore, India*

- Administered and provisioned AWS infrastructure (EC2, S3, IAM, VPC) using version-controlled Terraform modules, applying Infrastructure as Code principles to enable repeatable, auditable, and secure deployments
- Designed and optimized CI/CD pipelines using GitHub Actions as part of the broader DevOps architecture, reducing deployment lead time by 30% and enabling faster, safer release cycles.
- Containerized microservices with Docker and deployed on Kubernetes, ensuring **100% environment consistency** across development and staging environments.
- Automated infrastructure and deployment tasks via Bash and Python scripts, eliminating manual steps and reducing human error.
- Configured AWS CloudWatch dashboards and alarms for proactive monitoring and incident response.

Vected Technologies Pvt. Ltd. **November 2024 – February 2025**
Intern *Indore, India*

- Supported automation of deployment pipelines and management of cloud infrastructure, gaining hands-on experience with CI/CD tooling, Docker, Kubernetes, and AWS administration.

PROJECTS

Automated AWS Infrastructure with Terraform | Terraform, AWS EC2/S3/IAM/VPC, Bash

- Built reusable Terraform modules to provision multi-tier AWS environments, cutting manual setup time .
- Implemented remote state management via S3 backend with DynamoDB locking for safe collaborative infrastructure workflows.

End-to-End CI/CD Pipeline with Github Action & Docker | Docker, GitHub-Action, Linux

- Built an automated CI/CD pipeline integrating build, test, Docker packaging, and deployment on each Git push, enabling daily releases with zero manual intervention.
- Implemented rolling update strategies achieving zero-downtime deployments in containerized environments.

AI-Powered Bulk Email Automation Sender | Python, SMTP, OpenAI API, Pandas

- Automated sending of personalized emails to multiple recipients using SMTP.
- Integrated AI for dynamic email customization.
- Attached resume programmatically and managed contact data via CSV.

TECHNICAL SKILLS

- Cloud & IaC:** AWS (EC2, S3, IAM, VPC, Lambda, RDS, CloudWatch), Terraform, Ansible
- CI/CD & Automation:** GitHub Actions, Bash Scripting, Python
- Containers & Orchestration:** Docker, Kubernetes (K8s), Helm
- OS & Networking:** Linux (Ubuntu), TCP/IP, DNS, SSH, VPC Networking, Firewalls
- Monitoring:** AWS CloudWatch, Prometheus, Log Analysis, Alerting & Dashboards
- Version Control:** Git, GitHub, Git Bash

CERTIFICATIONS

- AWS Cloud Practitioner Essentials
- IBM Cloud Essentials

EDUCATION

Medi-Caps University **2020 – 2024**
Bachelor of Technology – Mechanical Engineering *Indore, India*
